SUMMARY

Experienced Full-Stack Developer with 2 years of proven track record in developing and maintaining web solutions using modern technologies such as React.js and ASP.NET Core. Proficient at designing and implementing responsive, user-friendly interfaces. Seeking a new challenge to further improve technical skills and contribute to innovative projects.

EDUCATION

Montclair State University

Bachelor of Science in Computer Science, Minor in Japanese

Montclair, NJ

Jun. 2022

SKILLS

Programming Languages: JavaScript, Typescript, C#, PHP, Python

Technologies / Frameworks: React.js, Vue.js, ASP.NET, RESTful service design, Linux, Git

EXPERIENCE

Full-Stack Developer

2nd Foundation Software

Hackensack, NJ

Jun. 2023 – Present

- Oversee the design and creation of an Enterprise Resource Planning (ERP) application using React and facilitating internal APIs, resulting in a 43% increase in operational efficiency and improved data accuracy.
- Perform 25+ code reviews in pull requests, offering valuable feedback to enhance code quality and promote best practices.
- Collaborate with a global team to develop and design new features, improving production efficiency and performance by 36%.
- Optimize version control and deployment with Git and Azure, driving strong and detailed development outcomes.

Software Developer

Kollin's Communication Inc.

Ramsey, NJ

Nov. 2022 – Jun. 2023

- Developed exclusive BrightScript programs for BrightSign players, boosting operational efficiency and reducing content rendering time by 75%
- Produced well-documented, clean code for projects, ensuring readability and maintainability.
- Collaborated with project manager to design and implement projects, consistently delivering client-focused products.
- Implemented timely website updates, promptly resolving security and bug issues to optimize user experience.

PROJECTS

Fictional Bank – College Project

PHP, SQL, HTML, CSS

- Designed and fine-tuned the database schema, achieving optimal data retrieval and manipulation processes for efficiency and performance.
- Collaborated with a team to build framework-independent pages, establishing a robust foundation for web development.
- Led seamless management of the web application, leveraging PHP and SQL for efficient CRUD operations.

Ticket Tracker – Personal Project

SQL, C#, ASP.NET, MVC, Auth0

- Proactively explored various technologies, ultimately selecting and delving into ASP.NET and MVC design, expanding upon existing knowledge and expertise.
- Implemented a robust and secure login system by integrating third-party authentication Auth0.
- Created an intuitive and responsive user interface utilizing Bootstrap, providing a seamless user experience.
